SUMMARY

Junior software developer 2 years hands on experience maintaining, designing and enhancing applications using C#, ASP.NET MVC/Core, SQL Server, JavaScript, HTML, CSS, and Bootstrap in collaborative agile teams. Strong background in backend and front-end development, Azure Devops, SQL Server and proven ability to deliver end-to-end software solutions, analyze codebases, identify root causes, implement fixes or solutions, and develop new features following the best practices. Experienced working with senior and lead developers, contributing to real-world systems and solutions used by clients and continuously strengthening problem-solving skills through a solid understanding of C# language fundamentals, algorithms, and data structures while applying professional communication skills. I am passionate about learning news technologies and acquiring news skills as I recently earned the Microsoft Azure AI Fundamentals (AI 900) certification. I am a hardworking and an adaptable professional who always strives to deliver the best and high quality of work.

WORK EXPERIENCE

10/2024 – Present
Durban, South Africa

Founder & Software Developer, *Diski360 Sports Management System*

- Designed and developed Diski360, a web-based sports management platform for football clubs, leagues, players, and administrators.
- Built a responsive web application using C#, ASP.NET MVC/Core, SQL Server, JavaScript, HTML, CSS, and Bootstrap, ensuring seamless access across desktop, tablet, and mobile devices.
- Developed modules for player registration, team management, fixture scheduling, match reporting, league standings, and performance statistics.
- Designed and implemented database architecture, authentication systems, role-based access control, and administrative dashboards.
- Managed the complete software development lifecycle independently, including requirements gathering, system design, development, testing, deployment, and maintenance.
- Improved operational efficiency by digitizing manual league and club management processes and providing centralized access to competition data.

10/2023 – 10/2024
Durban, South Africa

Junior C# Developer, *XET Group*

Bus Tracking System – eThekwini Municipality

- Designed and implemented a back-office web portal and a Flutter mobile application featuring real-time GPS tracking, using C#, ASP.NET MVC, HTML, JavaScript, SQL Server, and Dart.
- Developed Restful Web APIs using C# as well as .NET Core amd integrated them with a Flutter mobile application to ensure a seamless data displaying and retrial from the SQL Server database.
- Debugged and validated code to ensure the required functionality and reliability before deployment.
- Collaborated with cross-functional teams on code reviews, technical documentation, and solution design to maintain high development standards.
- Utilized GitHub for code version control, contributing to team collaborations, and codebase management.

EDUCATION

02/2020 – 11/2022
Durban, South Africa

ICT: Business Analysis, *Durban University of Technology*
I graduated from the Durban University of Technology in 23 May 2023 with a Diploma in ICT: Business Analysis. This qualification provided a comprehensive focus on analyzing business problems and rooms for improvements and implementation of proper solutions or systems utilizing C# and well known frameworks like ASP. NET and .NET Core.

01/2019 – 12/2019
Ingwavuma,
South Africa

Grade 12/Matric, *Zombizwe High School*

SKILLS & CERTIFICATIONS

Durban, South Africa

Back-end
C#, ASP.NET MVC, .NET Core, SQL Server, Node js

Durban, South Africa

Front-end
HTML, CSS, JavaScript, JQuery, Bootstrap, Flutter, Dart

Durban, South Africa

Certifications
Microsoft Certified: Azure AI Fundamentals (AI-900)

Durban, South Africa

Development Skills
Debugging, Troubleshooting, Agile Work flow, Problem-solving, Attention to detail
